¹In the German academic system, the *venia legendi* (lit. 'permission to lecture') in a given field is obtained after the successful completion of a Habilitation, which entails the assessment of teaching, university service, research activity, and especially the writing of a Habilitation thesis, including its positive evaluation by three internal and two external reviewers. My Habilitation thesis was positively assessed by Olav Hackstein (historical and Indo-European linguistics), Jonathan Harrington (phonetics), Hinrich Schütze (computational linguistics), Donca Steriade (phonology), and Adam Albright (computational phonology). Completing a Habilitation and receiving a *venia legendi* in a particular specialization is usually a precondition for ultimately obtaining the rank of Full Professor with tenure.
